For the purpose of this plan:

1. The stormwater management system shall be designed so that peak flows do not exceed:
   - 145 m³/sec in the Pentecost Drain
   - 15.63 m³/sec in the Southbrook Stream
   - 154 m³/sec in the Northbrook Stream

2. No stormwater discharge from the Outline Development Plan area shall be directed to the Wakefield Stream.

Note: Refer to map legend sheet.
