## APPENDIX 4: PHOTOGRAPHS

Note that all photographs are taken with a digital camera with a focal length that is the equivalent of 50mm. They are intended to illustrate points made in the Landscape Effects Assessment Report and not to exactly simulate the field of view that is taken in by the human eye.

**Photograph A:** View across the Bagrie farm from the corner of Main Drain and Bradleys Road. The established trees and chicken farm buildings of the current farming operation can be seen in the mid ground.

**Photograph B:** View across the site and the adjacent land to the southeast from Main Drain Road as it follows the top of the Cust River stopbank adjacent to the site's southeastern boundary.
