

River Road Urbanisation

River Road between Ashley Street and No. 61 River Road

Construction of new kerb and channel, footpath, road widening River Road begins mid March.

Background

River road is becoming an increasingly busy area with increased vehicle traffic and public transport, as well as walking and cycling for people to access public transport in the area, the dog park and other recreational uses. This project aims to provide safe multi modal access to the newly constructed Park and Ride and to better accommodate bus movement through the area.

The work will include

- Construction of new kerb and channel
- Construction of new footpath
- Road widening
- Relevant drainage upgrades.

Timing of work

The work is due to commence 18 March and run through until the end of May 2024.

Traffic impacts

Traffic Management impacts will be communicated in advance as we progress. Expect some minor delays however we will do everything possible to minimise this.

Please turn over

General impacts

A normal amount of noise, dust, and potential night works (to be confirmed).

Thank you for your patience while we complete this work.
