Prequal tier status

Is your company currently prequalified in this category? Yes No

If yes, our current tier is:

And the tier we would like to qualify for is:

Background

This application is for the drilling/thrusting/mole-ploughing category of the Waimakariri District Council's Civil Works Prequalification List.

Activities covered by this category include:

- Drilling of pipelines
- Drilling of ducts
- Thrusting of pipelines
- Thrusting/jacking of carrier pipes
- Chain trenching

There are two tiers in this category, Tier A and Tier C, with the difference between the tiers being:

Tier A

Covers suppliers who can carry out the more involved forms of trenchless construction, including drilling, jacking, thrusting, boring, and including larger diameter pipes at depths greater than 1m.

Tier C

Covers suppliers who can carry out the simpler forms of trenchless construction, such as chain trenching, mole-ploughing or 'ripping', which is generally used for depths around 1m, and for smaller diameter pipes.

Suppliers should indicate what forms of construction they are able to undertake, and the Procurement Team will review these and determine which tier is appropriate. In general omitting information could result in the supplier not being prequalified (i.e. failure to supply information on a supplier's drill or drilling equipment would cause them to fail prequalification).

The intent of the category is to cover contractors who are able to carry out trenchless construction themselves, rather than those who subcontract it out. Not being qualified in this category will not prevent contractors from carrying out (or subcontracting) trenchless construction as part of a larger project, but it will prevent contractors from carrying out works that only involves trenchless construction.
