Prequal tier status

Is your company currently prequalified in this category? Yes No

If yes, our current tier is: Tier A Tier C N/A

The tier we would like to qualify for is: Tier A Tier C

Background

This application is for the Pipe Investigation/CCTV Category of the Waimakariri District Council's Civil Works Prequalification List.

Activities covered by this category include:

- Drainage Connectivity Surveys (smoke, dye, etc.)
- CCTV of main pipelines (per the NZ Pipe Inspection Manual 4th Edition)
- CCTV of lateral pipelines
- Root cutting of pipelines
- Cleaning/jetting of pipelines.

There are two Tiers in this category, Tier A and Tier C, with the difference between the tiers being:

Tier A

Covers suppliers who can carry out the more involved forms of CCTV inspection, such as the visual inspection of pipelines in accordance with the NZ Pipe Inspection Manual 4th Edition. Additionally there are requirements around cameras having the ability to Pan-Tilt-Zoom, the supplier being able to score the condition of the pipe, the supplier being able to record the profile of the pipe (percentage grade or rise/run). Suppliers would also be expected to detail the resolution they can provide, and format of reporting, such as example report tables, and/or the ability to upload completed inspection videos.

A key criteria of Tier A would be having staff with the relevant qualifications as per the NZ Pipe Inspection Manual, these being NZQA Unit Standards 30094, 30095 and 30096.

Tier C

Covers suppliers who can carry out more straightforward forms of investigation, such as the investigation of laterals to locate blockages, and the simple cleaning or rodding of these lines.

Suppliers should indicate what forms of inspection they are able to undertake, and the procurement team will review these and determine which Tier is appropriate. In general, omitting information could result in the supplier not being prequalified (i.e. failure to supply information on CCTV equipment would cause them to fail prequalification).

The intent of the category is to cover contractors who are able to carry out inspection work themselves, rather than those who subcontract it out. Not being qualified in this category will not prevent contractors from carrying out (or subcontracting) this type of work as part of a larger project, but it will prevent contractors from carrying out works that only involves work of this type.
