Is your company currently prequalified in this category? Yes No

If yes, our Current Tier is: _____

And the Tier we would like to qualify for is: _____

Background

This application is for the Road Improvements, Kerbing and Road Drainage category of the Waimakariri District Council's Civil Works Prequalification List.

Activities covered by this category include:

- Safety Improvements
- Installation of Throat/Pedestrian Islands
- Installation of Roundabouts
- Road Re-alignments, parking bays
- Kerb Alterations
- Sump Installation
- Pavements and Surfacing required for the above.

There are three Tiers in this category, Tier A, Tier B and Tier C, with the difference between the tiers being:

Tier A

Covers suppliers who can carry out projects, which generally involve projects with values over \$1million, which have high levels of risk and significant complexity.

A supplier's reference projects should be of a suitable scale for this tier, they should also have a high level of plant and equipment, with specific equipment like graders and rollers being an advantage. This tier also has a high requirement on systems and administration, most suppliers in this section would have robust systems and ISO certification, or be in the process of gaining ISO certification.

This is the highest tier of the Category, and is suitable for suppliers who can carry out complex work with a high degree of autonomy, and that have a high level of trust with Council.

Tier B

Covers suppliers who can carry out projects, which generally involve projects with values between \$500,000 and \$1million, which have medium levels of risk and reasonable complexity.

A supplier's reference projects should be of a suitable scale for this tier, they should also have a reasonable level of plant and equipment, with various sizes of excavators. This tier also has a requirement on systems and administration, most suppliers in this section would also have reasonable Q/A systems, and track record of these systems, such as example reporting or claims.

This is the middle tier of the Category, and is suitable for suppliers who can carry out work for the Council with a standard level of direction from Council. The bulk of the Council's projects will fall within this category.

Tier C

Covers suppliers who can carry out projects, which generally involve projects with values less than \$500,000, which have standard levels of risk and routine complexity. This is also the entry level tier, where the suppliers and their systems may be unknown, or less well defined. The omission of some material may result in suppliers being appointed to this tier of the panel as an interim measure.

Suppliers should indicate what levels of work they are able to undertake, and the procurement team will review these and determine which Tier is appropriate. In general, omitting information could result in the supplier not being prequalified (i.e. failure to supply information on appropriate plant or staff would cause them to fail prequalification).

Supplying information from projects completed for Council would be beneficial, such as contractor's copies of the Contract Completion report, especially where the supplier is intending to prove they can advance to the next tier on the prequalification list.

The intent of the category is to cover contractors who are able to carry out the work themselves, rather than those who subcontract it out. Not being qualified in this category will not prevent contractors from carrying out (or subcontracting) this type of work as part of a larger project, but it will prevent contractors from carrying out works that only involves work of this type.
